

# TEMPTATION.

To stumble into  
somebody else's  
computer system.

To be some-  
place you're  
really not sup-  
posed to be.

And to get the

get to start with.  
That's it. From  
there, it's up to you.

If you're clever  
enough and  
smart enough,  
you could

discover a world

# HACKER<sup>TM</sup>

strange feeling  
that it really does  
matter. "LOGON  
PLEASE:" is all you

you've never  
before experienced  
on your computer.  
Very tempting.

**HACKER HINTS**

# TEMPTATION.

It's about the instructions for Hacker. There aren't any. (After all, if you really accidentally stumble into someone else's computer system, no one will be there to help you.)

If you get really stuck, we can provide a set of "Hacker Hints." (Details on enclosed card.) However, this is a temptation you should resist, if you can.

### **LOGON PLEASE:**

What's going on here? Who are these guys? What are they doing? What am I doing?

In Hacker, it's up to you to figure it out. We can't tell you. We won't tell you. As every hacker knows, there just aren't any instructions for this kind of thing.
